SUMMARY

Data Analyst with 10+ years of analytical experience: from government program monitoring to product analytics in IT. I specialize in identifying growth opportunities and improving key metrics through A/B testing and user behavior analysis. Proficient in Python, SQL, Tableau, and statistical methods

SKILLS

Core Competencies: A/B Testing, Product Analytics, Data Analysis, Statistics, Conversion Funnels, Cohort Analysis, User Behavior Analysis, KPI Definition, SQL Optimization, Machine Learning (regression, classification, clustering), Stakeholder Communication, Analytical Reporting
Tools: Python (NumPy, Pandas, Matplotlib, Plotly, Scikit-learn, Statsmodels, Scipy), SQL (ClickHouse, Postgres), Tableau, Excel, Google Analytics (GA4), Google Tag Manager (GTM), Git
Languages: English (B2), German (Goethe-Certificate B1, 2018), Russian (native)

EMPLOYMENT AND PROFESSIONAL EXPERIENCE

Data Analyst at *Maxbitsolution (04.2024 – 06.2026)*

- Drove product decisions by conducting over 50 in-depth studies, evaluating KPIs and identifying high-value user segments to guide product roadmap prioritization
- Designed and analyzed more than 15 A/B tests, delivering clear recommendations on launch, iteration, or rollback of proposed features based on statistical significance of target metric differences
- Developed and maintained interactive Tableau dashboards for stakeholder monitoring of user activity and feature engagement, eliminating the need for ad-hoc queries

Program Analysis and Monitoring Specialist at the *State Committee on Science and Technology (04.2012 – 08.2022)*

- Analyzed data on scientific and technical programs, prepared consolidated reporting and analytical materials for management
- Developed a metrics framework for evaluating scientific and technical programs, which enabled quantification of results across different output types: product-based deliverables, unique product units and technical documents
- Interacted with stakeholders at all levels and prepared justifications for management decisions

PROJECTS

https://elenankn.github.io/data_portfolio/ - data analysis, A/B testing, and machine learning projects:

- End-to-end A/B-test. Full cycle from hypothesis formulation to product decision. Revealed a statistically significant drop in 7-Day Retention. Recommended feature rollback to prevent user churn
- User Flow Sankey Diagram with Plotly. Visualized user behavioral patterns. Delivered actionable recommendations to decrease product return rate
- Machine Learning: Multiclass Classification (Logistic Regression, SVM, KNN, Decision Tree, class imbalance handling); Regression Optimization (feature engineering), Clustering

EDUCATION

The Belarusian State University. Mechanics and Mathematics Faculty (graduate studies)
2001-2006, with honors
The Joint Institute of Mechanical Engineering of the National Academy of Sciences of Belarus (postgraduate)
2006-2009, Candidate of Sciences (Ph.D. equivalent)

CERTIFICATIONS

Google Analytics Certification (Google, 2026)
Advanced A/B-test simulator (Karpov.courses, 2026)
Advanced Data Analytics Professional Certificate (coursera.org / Google, 2025)
Machine Learning Specialization (coursera.org / DeepLearning.ai, Stanford University, 2024)
Data Analysis in Industry (T-Education, 2023)
